WORK EXPERIENCE

Alliance Overseas

Web Specialist — November 2023 - May 2024

- Improved system reliability by 25% through regular server maintenance, resulting in 20% reduction in downtime.
- Ensured 99.99% uptime for web-based services, with a 90% customer satisfaction rate.
- Developed and hosted a responsive company website, resulting in a 40% increase in user engagement and a 20% boost in online sales.

T.B. Solutions - SEO Domains

Python Developer — May 2024 - December 2025

- Developed and maintained 14 new Python scripts, ensuring they were modular, reusable, and well-documented for future development.
- Automated workflows using Python and Zapier, reducing manual data entry, improving data accuracy and streamlining reporting processes.

AGT Software Partners (All Generation Tech)

Software Engineering & Technology Dept. Intern — January 2026 - March 2026

- Collaborated with cross-functional, global development teams in a fast-paced environment.
- Supported the design, deployment, or optimization of enterprise-grade software solutions.
- Gained deep global exposure working alongside international tech professionals.

LTSL (Multimode Group)

IT & IFS Dept. Intern — May 2026 - July 2026

- Learning and documenting enterprise software and business workflows
- Analyzing ERP systems and digital tools used in daily operations
- Gaining hands-on exposure to IT systems, process flow, and business software

Kasaba Fashions, Logistics & Constructions (KFLC)

Military Procurement Executive — November 2026 - Present

- Supporting global trade, defense procurement logistics, and technical tendering operations.

EDUCATION

Motijheel Govt. Boys' High School

SSC - 4.50 — 2017 - 2019

Willes Little Flower School & College

HSC - 4.67 — 2019 - 2021

Notre Dame University Bangladesh

B.Sc. in CSE - 3.75 — 2022 - 2026

Thesis: *Edge Enabled AI Diagnostic Framework for Resource Constrained Rural Clinics*
Advisor: Prof. A. H. M. Saiful Islam & Dr. Fernaz Narin Nur

- Developed an offline AI based multi disease screening system for rural clinics in Bangladesh.
- Built and evaluated ML models for diabetes, hypertension, malaria, and tuberculosis prediction.

PROJECTS

Student Performance Classification, Visualization and Prediction Using Machine Learning

- Built a prediction system with multiple classifiers (Decision Tree, Random Forest, Logistic Regression, MLP). Added interactive visualizations, sequential graph viewing, and prediction features with custom input support.

Wayback Machine Scraper

- Engineered a Python-based, concurrent web scraping system that fetches archived snapshots from the Wayback Machine across multiple time points. Implements proxy rotation for distributed requests, detects redirections and error pages, extracts HTML metadata (title, description, keywords), and applies Latent Semantic Analysis (LSA) for automated summarization of homepage content. Generates structured CSV outputs for temporal content analysis and large-scale domain monitoring.

Domain Nameserver History Analyzer and Reporting Tool

- Developed a Python-based tool that fetches historical nameserver data, analyzes stability and expiration patterns, identifies good and bad domains, and generates detailed reports for domain management and monitoring.

GoDaddy Auction Monitor

- Developed a high-performance domain auction monitoring system leveraging ThreadPoolExecutor-based concurrent scraping, rotating proxy infrastructure, and multi-agent HTTP client orchestration (requests, Selenium) to systematically extract real-time auction data from GoDaddy's marketplace APIs and DOM structures, implementing intelligent retry mechanisms, dynamic header rotation, anti-detection protocols, and automated CSV report generation with bid threshold filtering for scalable domain investment intelligence and competitive market analysis.

Site Analytics Aggregator

- Built a distributed web-scraping system using ThreadPoolExecutor concurrency, dynamic proxy rotation, and multi-client abstraction (requests, cloudscraper, Selenium, Playwright) with anti-detection, caching, rate-limiting, and automated CSV reporting for scalable market and competitive-intelligence data extraction.

SKILLS

- **Frontend Development:** HTML, CSS, JavaScript
- **Backend Development:** Python, C++
- **Tools & Frameworks:** Django, MySQL, Git, GitHub, Jenkins
- **Other Skills:** Data Analysis, Automation, Problem Solving

CERTIFICATIONS

CS205: Building with Artificial Intelligence

Functional Programming in Python

Artificial Intelligence Fundamentals by IBM

Machine Learning Operations (MLOps) with Vertex AI Model Evaluation

Web Development Essentials by ICT Division Bangladesh
